Who we are

We are a group of young gardeners between the ages of 16-21. Well trained from previous experiences with U.G.Y.E, we come to work ready to learn about new things and plant new produce in many different ways.
Our Mission

Our mission is to capture the attention of the community. We want to show them that anyone could garden and possibly design their own. We achieve this by using different styles of gardening so the community can become aware of all the possible ways they can make a garden. We want to convince them that gardening is not only healthy, but that it is cost cutting as well.
Our Sites/ Partners

We have four main sites at the following:

• St. Olaf
• Oak Park
• UROC
• Urban Baby
Oak Park Watermelon Pockets

Oak Park Community Food Fence
I am a student at North Hennepin Community College. I graduated the year of 2012. I am eighteen years old. After 2 years college I plan on attending Howard University in Washington, D.C. I plan on doing a double major in business marketing and theater performance. I wanted to become an entrepreneur after college. Some groups that I was involved in are Multicultural achievers, Diversity council, Business case competition, Lundstrum performing arts, Desire, and Dynasty drill team. I've been working with the university of Minnesota landscape arboretum program for 7 years.
Over the Summer

- We have made six demonstration gardens
- Took a field trip to the Landscape Arboretum
- We took a trip to the University of Minnesota
- We have Done two presentations to donors.
- We have taken a cooking Class
- We have had meetings with Tim, and Jaime to find out more information on what we can possibly do next

Summer Fun
Now that we have accomplished many things this summer, there is always room for more. We want to expand! We want to establish a series of container gardens in vacant lots that the community could come and enjoy. We want to make personal container gardens at the homes of North Minneapolis citizens. We want to let the community know that container gardens are not only easy, but cost cutting, very fast, and very healthy. We will be known!
Now

• Grow bags only
• 7 locations
  - UROC
  - Oak Park Community Center
  - Minneapolis Public Housing (2 sites)
  - Venture North
  - Juxta Position Arts
  - Saint Olaf Community Campus
Our Goals

• Outreach to the North Side community
• Promote Healthy living and eating
• Promote easy Gardening
