

JANNA KIEFFER, P.E.

Barr Engineering Company

Janna Kieffer specializes in stormwater management, including hydrologic and hydraulic modeling and water quality analyses. During her 10 years at Barr Engineering Company, she has gained considerable experience in quantifying the benefits of stormwater best- management practices, and has recently been involved with the Minimal Impact Design Standards (MIDS) project for the MPCA.

Janna has a B.S. engineering degree from the Colorado School of Mines and a M.S. degree in water resources engineering from Mississippi State University.
