

KURT LEUTHOLD, P.E., LEED AP

Barr Engineering Company

Kurt has specialized in the areas of hydrology, hydraulics, water resources, and site development over the past 24 years working for Barr Engineering Company. In the last twelve years, his emphasis has been on sustainability and the design of alternative stormwater management, low impact development, and “green” building projects for municipalities and private development.

Kurt has a Civil Engineering degree with an emphasis in Water Resources from Michigan Technological University.
